

MAKE IT **REAL**
MAKE IT **USEFUL**

Easy3DMaker

The compact 3D-printer with a big cross-section for the realization of all your projects.

The amazing world of 3D-printing

Discover the true magic of 3D-printing. What have only been available for a small group of people, from now on you can fulfil directly on your desk.

The virtual world of 3D-computer models will become reality before your face.

All parts of the printer are made of high-class aluminium-alloy and processed steel. Additional all extremely claimed parts like the extruder-driving wheel and the guiding tubes are designed for a long using.

Technical information:

printing area:
200 x 200 x 230 mm

printing volume:
9200 cm³

slice resolution:
0.08 - 0.25 mm

measurements of the printer:
400 x 400 x 500 mm

weight:
17 kg

max. printing speed:
80 mm/s

max. crossing speed:
230 mm/s

power supply:
24V /180W

certificates:
CE / WEEE

printing material:
PLA and ABS

available colors:

 black

 red

scope of delivery:

- USB cable
- CD with drivers
- Software Repetier-Host
- manuals in English language
- tools
- 230/24V power supply unit
